Product: [Malwarebytes Endpoint Protection](#)

The best endpoint protection we've used so far.

Malwarebytes is a really useful protection for our users and administrators, it has a cloud options that you can use to manage your users, we've been using it for a year now and it has been very effective on blocking threats in our network.

Product: [Anti-Malware for Business \(Legacy\)](#)

Used to be king, but now it's getting old and ready to put out to pasture

I've had a overall very positive experience with Malwarebytes Anti-Malware Legacy. It's been very effective at detecting Malware while also having a very small footprint and not interfering with our Windows Server and VDI Environments.

The Best Cybersecurity Program for your company, or for personal uses.

Reviewer Role: Data and Analytics Company Size: 250M - 500M USD Industry: Communications Industry

Malwarebytes, is an excellent tool that has allowed me for a long time to prevent my computer from being filled with viruses, this tool is a quick option to detect and prevent any virus on our computer from having a quick scan and perfectly detect any virus without having to do a very advanced scan, which saved a lot of time, once I tried this program on my personal computer, I definitely discussed it with ...

2019 ADAME ransomware attack

Reviewer Role: Enterprise Architecture and Technology Innovation Company Size: <50M USD Industry: Manufacturing Industry

In 2019 my company was hit with a ransomware attack (ADAME). We quickly hired a consultant who suggested we purchase Malwarebytes Endpoint Protection. The purchase of the software and the deployment went as expected with only minor issues in older machines. The entire operation took only a few hours and we could see results quickly.

Malwarebytes EndPoint Protection - best software for security

Reviewer Role: Analyst Company Size: 50M - 250M USD Industry: Services Industry

Malwarebytes finds things that some of the major antivirus programs out there are unable to find and does a great job of eliminating those problems. it has helped me at home and in the corporate environment on numerous occasions. There is a free version and it is very effective. It also has a paid version, which has more functionality and both versions coexist very well with other antivirus and ...

Malwarebytes an Industry Leader in the fight against malware

Reviewer Role: Consultant Company Size: <50M USD Industry: Services Industry

Malwarebytes has helped keep things running smoothly, while not taking control of system resources and adding a lot of bloatware that you do not need. Has provided exceptional protection from today's threats as well as great support.

MalwareBytes is the Best!

Reviewer Role: Infrastructure and Operations Company Size: Gov't/PS/ED <5,000 Employees Industry: Education Industry

MalwareBytes has always been consistently on the ball. Customer service and support are some of the best if not the best that I've had to deal with compared to other companies. Great company, great people, great product!!

Product: [Malwarebytes Endpoint Protection](#)

Malwarebytes was just what we were looking for, and it continues to evolve.

Reviewer Role: Infrastructure and Operations Company Size: 50M - 250M USD Industry: Retail Industry

We have been pleased with the ability to manage all of our endpoints nationwide with great ease and effectiveness. We are able to manage endpoints by specific location and function and have had great success in keeping our systems secure. Malwarebytes also does a really good job of keeping our backend updated and full of the latest and greatest features. I have been very happy with dashboard ...

Amazing Tool for Protecting your Networks,automatically blocks websites that are malicious

Reviewer Role: Sales and Marketing Company Size: 500M - 1B USD Industry: Finance Industry

It helps in detecting vulnerable endpoints on your systems against exploits and cyber attacks. It is providing three modes of scanning such as flash, quick and full. It automatically blocks websites that are malicious. It automatically detects unwanted programs such as extensions and removes them. It is offering a variety of scanning types. It helps in identifying all known malware. It is also providing ...

Malwarebytes protects your users from themselves.

Reviewer Role: Infrastructure and Operations Company Size: <50M USD Industry: Services Industry

We've been using Malwarebytes products for 11 years at my organization. It's easy to install, configure and monitor. It doesn't conflict with other software we are using. It's really worry free and protects my users without getting in their faces. I've had staff bring in their personal PCs from home, virus laden, and Malwarebytes cleans them up quickly and gets them back up and running. There is really no ...

Product: [Malwarebytes Endpoint Protection](#)

Works well after lots of tweaks.

Reviewer Role: Infrastructure and Operations Company Size: 50M - 250M USD Industry: Manufacturing Industry

We are using the Cloud version currently. The online GUI is pretty sparse, and is missing some key features, and overall the product seems to be very intrusive compared to other versions (non-cloud). we have gotten it working after much time spent tweaking.

Malwarebytes Endpoint Protection - Best for the Protection

Reviewer Role: Analyst Company Size: 500M - 1B USD Industry: Services Industry

Easy to download and install, just access its website and we can start using it for free after downloading. We can choose between different types of analysis, from a quick one to something more advanced or by units or folders according to our needs. The detected files are quarantined or we can delete them. Updates practically daily and takes up little disk space.

Malwarebytes Protection to help you feel easy at night

Reviewer Role: Infrastructure and Operations Company Size: <50M USD Industry: Services Industry

Malwarebytes is a good product for us. We are a smaller company so we don't have the time to deal with issues that arise when it comes to security. Having Malwarebytes installed helps us to have a peace of mind.
